## INVESTING IN TECHNOLOGY

This simple solution gives V3 a easy to use system that can operated by all their staff.

## OVERVIEW

At the end of a row of buildings in a cobble stoned courtyard off of Sloane Square, you will find Venture Three, a leading brand strategist with clients who include Sky, King and Manchester United.

## LOCATION

London, United Kingdom

## HIGHLIGHT

The front glass doors bring you into a main atrium which has beautifully curved high ceilings. The décor is sympathetic to the buildings original features. Exposed brick work, cased cables and raised sockets have not deterred from the origins of the building, but have been gently added to with modern day technology. Oak white washed floors are fitted throughout the building and up the stairs to the first floor, laid to the diagonal a simple floor creates a contemporary and modern feel.

Put simply, Bose & B&W technology offers us the power and audio quality we were looking for and Polycom opened up our simple meetings rooms the the world.

“Tom said, the service he received from AT&C was superb ‘we left them to their own devices and the job was done.’”

Simple technology and Polycom video conferencing maximises the potential of this multifunctional space

The IT manager at Venture Three, Tom Welch, said that they were looking to install their sound system first and foremost and they contacted Bose who put them in touch with leading system integrator AT&C Professional Systems Ltd (AT&C).

Venture Three's brief to AT&C was to create meeting rooms that would allow simple integration between the systems they were currently using including Sky TV, Polycom Video Conference, laptop connectivity and audio conferencing and make it simple to control and use.

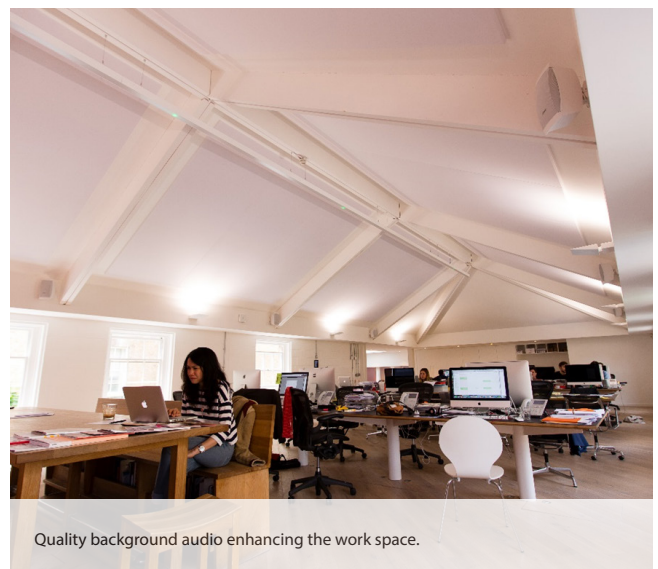

In the two adjacent first floor meeting rooms you will find 55" Samsung Displays built in to the wall along with a B&W Panorama sound-bar. This is a perfect solution due to being low profile and it fits discreetly into most systems to bring you rich quality sound. The AMX processor is ideal for single room environment supporting modern networking standards. Each wall also has a custom AV plate for USB/ HDMI/VGA & PC Audio input plate allowing additional use of other systems. The fully seated meeting room also benefits from Video Conferencing facilities.

An iPad mini in each meeting room has been custom programmed to Venture Three's requirements. It has a simplified the transition between the key systems they use and allows seamless transition from one media source to another

Bose DS40SE surface mount speakers are positioned throughout the atrium, ground and first floor offices. They are a versatile, high performance full range speakers designed for foreground and background music. Installed is a Sonos connect that allows Venture Three to play all the music they want throughout the building controlled from iPad's in 3 main areas.

iPad control enables the agile workforce to use the technology intuitively

Quality background audio enhancing the work space.
