Video Solutions in Hospitality and Leisure

exterity ®

Keep your guests coming back with the latest in-room entertainment, services and multi-device support

Market-leading IP video from Exterity enhances the unique services hotels and leisure cruise ships can offer their guests through the secure distribution of high quality TV and video channels across a wide range of devices.

Enterprise IP Video Solutions

Create a unique experience for your guests

Exterity hospitality and leisure solutions are used worldwide to provide guests with a "home away from home" experience. Supply an unlimited number of high-definition TV and movie on-demand channels with stunning picture quality, as well as interactive guest services to any number of guest rooms and throughout the hotel - all via the TV or your guests' own mobile devices.

From hotels to cruise ships, the existing network is used to deliver all the expected guest services as standard. With customizable interface options across the full range of Exterity products, it has never been easier to create a unique guest experience.

Advantages of Exterity IP video and streaming solutions

Preserve internet bandwidth by delivering live TV and video directly on to your network.

Flexible and scalable to fit any size of installation and number of devices. Power over Ethernet simplifies installation and saves on cost of cabling and power points.

Easily create a unique, tailored look and feel.

Simple to set up and easy to manage; control the Exterity IP video system from anywhere on the network.

Built-in digital signage and seamless integration with complementary technologies such as room control, in-room dining and express checkout.

Video content is fully protected throughout our solutions with built-in technologies from HDCPv2, Arris SecureMedia and Samsung LYNK DRM.

Case studies

Best Western Olive Hotel

The Exterity IP video system provides international entertainment and news, catering to a wide range of interests throughout the hotel's 151 rooms.

"We pride ourselves in our ability to offer a world class hotel to visitors from across the globe and deploying an Exterity IPTV system was part of our strategy to offer the latest entertainment to our guests. This upgraded deployment allows our customers to unwind, relax and immerse themselves in the resort, so they can enjoy the experience to the fullest."

Best Western Olive Hotel in Bahrain

Retallack

Family-owned resort Retallack needed to offer a comprehensive in-room entertainment system in order to be awarded five star status.

"The flexible nature of Exterity's products meant that they could be fitted around the other suppliers' timetables, and the whole deployment was complete in a matter of days."

Retallack

Exterity Hospitality Clients

Exterity IP video solutions are deployed in leading hospitality establishments around the world. From live streaming of premium and foreign language channels, to hotel-wide digital signage and guest room entertainment, Exterity's end-to-end video solutions help you to provide a first class hotel experience.
